

A gem of a reporting tool that's more than just a fashion fad

Reporting is always a challenge in the fast moving fashion industry, and no more so than for Glenda Lovatt, CFO of Adorne Pty Ltd.

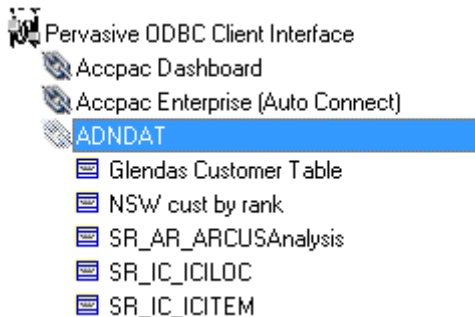

Adorne is a leading fashion accessories importer and wholesaler based in Brisbane, with wholesale stockrooms also in Sydney and Melbourne. Customers of Adorne are from all over Australia, New Zealand and the Pacific region.

Constantly changing trends mean that it is essential to stay on top of not only the financials, but also the sales analysis and stock position.

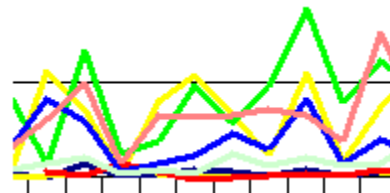

Finding the right tool to deliver up to the minute information lead to the selection of Alchemex.

“Simple, yet incredibly powerful, we can create some very quick reports to meet the needs of the organisation, from quick and slow moving stock lines, purchasing forecasts, benchmarking across the stock rooms and also sales analysis like never before.”

- Glenda Lovatt

“The fact that Alchemex connects to Sage Accpac ERP means that we could get up and running really quickly and we can also create reports using both the ERP and Sage CRM databases.”

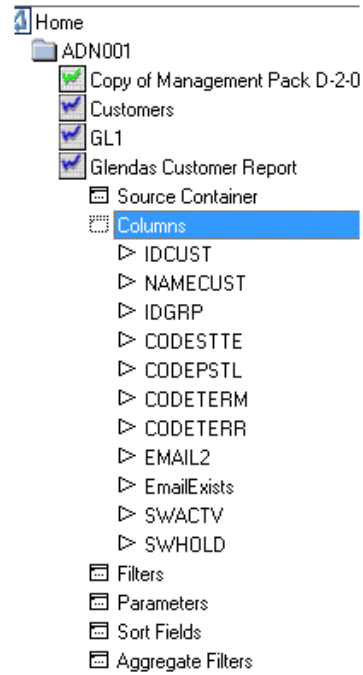

“As part of the process I followed the online training. Learning some new tricks in the Excel on Steroids course really got those reports looking great!”

“We can quickly manipulate our data to look at trends across customer type, across states, by sales person, by type of sale - the list is endless.”

“On my list is reporting across Sage Accpac ERP and our new payroll WageEasy to get some very valuable sales to wages analysis.”

Being an Excel wizard really helped Glenda get some quick success under her belt.

“With the assistance of our Sage Accpac Business Partner, SiRCIT, we have been able to get up and running really quickly and start generating our own reports - its so easy.”
